

# AI Apply: One-Click Job Application Engine

**UNSW Capstone – Term 2, 2025**

**Project Code:** P94

**Client:** Kushagra Bhatia & Alevtina Fokina, Co-founders, JobGen.AI

**Teams:** 9900-F12A-CAKE, 9900-W18A-ALMOND, 3900-H13A-APPLE

---

## Project Overview

Job seekers waste time manually filling out repetitive job application forms across platforms like **Seek**, **LinkedIn**, and **Indeed**. At **JobGen.AI**, we want to change that.

Our platform already provides users with a **tailored resume and cover letter** based on their profile and a job description. The **JobGen.AI Chrome Extension** already detects jobs and sends data to the backend.

What is missing: full **automation of the application process**.

Your mission is to extend the Chrome Extension so that when a user clicks “Apply”:

1. The extension sends job data to the backend.
2. The backend returns tailored resume + cover letter + pre-filled answers to Top 10 Questions.
3. The extension:
  - Auto-fills the job application form.
  - Uploads documents.
  - Fills in tricky fields (salary, years of experience, work rights, availability, etc.).
  - Fills common Top 10 Pre-Filled Questions (researched & supplied by teams).
  - Handles psychometric & scenario questions.
  - Shows a preview screen.
  - Submits the form.
4. The application is logged for tracking.

Result: **true one-click job applications for the user**.

---

## Scope of Work:

The extension should Detect application forms on:

- LinkedIn, Indeed, Naukri.com, Glassdoor, Seek (handle 10-CV limit → delete old CV if needed)

Auto-fill the job application form, including:

- Personal information: Name, Email, Phone, Address
- Employment history: Position title, Company name, Dates
- Education
- Experience questions (PM experience, etc.) → If not provided by JobGen.AI API, default
- Expected salary → Fetched from JobGen.AI API or fallback to AUD 120,000/year
- Work rights, Availability, Preferred location → via JobGen.AI API
- Top 10 Pre-Filled Questions → Teams will research and supply a list of the most common questions across Seek, LinkedIn, and Indeed → answers will be supplied by JobGen.AI API for each resume/cover letter.
  - Example fields: Location, Expected Salary, Visa Type, Nationality, Years of Experience, Availability, Preferred Work Location, Current Job Title, Current Employer, Notice Period.

**Handle file upload:** Upload resume, Upload cover letter (if provided)

**Seek-specific logic:** If 10 CVs already uploaded, delete one to allow new upload.

**Handle psychometric & scenario questions:**

- Likert scales → default to neutral/slightly positive profile.
- Scenario-based questions → fetch template answers via JobGen.AI API or use pre-defined set.

**Show a preview screen before submission:**

- Show user all autofilled data and uploaded files.
- Allow user to edit before final submission.

**Simulate form submission:**

- Trigger “Apply” / “Submit” button click.
- Log the application in Chrome Extension (optional).

---

## Technical Details

Technical Details Chrome Extension Responsibilities:

- DOM parsing and dynamic form detection.
- Field classification engine.
- Auto-fill engine.
- File upload & Seek file deletion handling.
- Preview screen UI.
- Submit action.

- Local application log (optional).

Backend (JobGen.AI Responsibilities):

- Tailored resume & cover letter generation API
- API endpoint provides: Answers to Top 10 Pre-Filled Questions.

---

## Timeline & Milestones (10 Weeks)

| Week | Dates         | Tasks                                                                                              |
|------|---------------|----------------------------------------------------------------------------------------------------|
| 1    | June 11–14    | Project Brief shared + Team Kickoff Meeting + Initial Platform Analysis (Seek / LinkedIn / Indeed) |
| 2    | June 17–21    | Finalize Platform Analysis + Research & define Top 10 Pre-Filled Questions + Share with JobGen.AI  |
| 3    | June 24–28    | Implement basic autofill (text fields), handle experience/salary defaults, start API integration   |
| 4    | July 1–5      | Add dropdowns, radio buttons, checkboxes. Implement file upload, Seek CV deletion                  |
| 5    | July 8–12     | Full flow: Apply → receive resume → fill form → upload → simulate submit                           |
| 6    | July 15–19    | Handle psychometric questions, first version of Preview screen                                     |
| 7    | July 22–26    | Finalize Preview screen; test on all target boards                                                 |
| 8    | July 29–Aug 2 | Polish UX, edge cases, local application logging                                                   |
| 9    | Aug 5–8       | Final report, code cleanup, client demo, UNSW submission                                           |

---

## Final Deliverables

Final Deliverables (Buckets)

Functional Demo

- Full working Chrome Extension.
- Live demo showing:
  - Autofill all fields (with API fallback for tricky fields).
  - Upload resume + cover letter.
  - Handle Seek CV deletion.
  - Fill psychometric questions.
  - Fill Top 10 Pre-Filled Questions.
  - Preview screen.
  - Submit application on Seek / LinkedIn / Indeed.

Documentation

- Architecture & Code Structure.
- Field Mapping & Handling (include default value strategy).
- API integration guide (JobGen.AI API endpoints used).
- Known limitations & future improvements.
- Setup guide for future devs.

#### Code

- Chrome Extension source code.
- GitHub Repo with setup instructions & README.
- Test scripts / sample job forms.

#### Constraints

- Must test on test accounts / forms, not personal live accounts unless permitted.
- Follow platform terms of use (we'll discuss boundary cases).
- Do not modify backend — only integrate via API.
- Target MVP boards: Seek, LinkedIn, Indeed. Bonus Credit – Naukri and Glassdoor

---

## Communication & Meetings

- Weekly sync with Kush/Alevtina (Wed or Fri suggested)
- Progress updates in Teams channel

---

## Key Deadlines

| Date            | Deadline                  |
|-----------------|---------------------------|
| <b>June 18</b>  | Project proposal to Basem |
| <b>July 6</b>   | Full end-to-end flow demo |
| <b>August 3</b> | Final build + demo ready  |
| <b>August 8</b> | Final project submission  |
